Publications Listed in This Compilation

Single copies of reports issued by various agencies and institutions are available at the following addresses:

Foreign Agricultural Service: Foreign Market Information Division, FAS, U. S. Department of Agriculture, Washington 25, D. C.  
(Copies of publications marked with an asterisk are no longer available. Many of them are on file in libraries.)

Economic Research Service: Division of Information, Office of Management Services, U. S. Department of Agriculture, Washington 25, D. C.

Other agencies of the U. S. Department of Agriculture: Office of Information, U. S. Department of Agriculture, Washington 25, D. C.

✓ Foreign institutions and State universities performing research under P. L. 480: The institution publishing the report, or Office of the Administrator, Economic Research Service, U. S. Department of Agriculture, Washington 25, D. C.

Reports and Publications Issued Before January 1, 1961

Inquiries should be directed to the addresses shown above. Offices receiving inquiries will redirect them to the correct address when necessary.

Available publications include agricultural situation reports and notes on the agricultural economics of countries and regions, commodity reports, agricultural competition and trade statistics and analyses, and reports on many other phases of foreign agriculture. Changes occur frequently in the availability of published materials. Also, newer releases replace those issued several years ago. Inquiries can be handled more advantageously by the offices or divisions of information when they specify subject matter and country or region than when identified only with older publications.

A SELECTED LIST OF PUBLISHED ITEMS CONTAINING ECONOMIC  
INFORMATION ON AGRICULTURE OF FOREIGN COUNTRIES AND  
FOREIGN AGRICULTURAL TRADE OF THE UNITED STATES

Compiled by Arthur W. True,  
Assistant to the Deputy Administrator,  
Economic Research Service

EXPLANATION

United States Department of Agriculture publications listed in this compilation are classified according to the agencies which issued them. Prior to April 1961, the Foreign Agricultural Service issued practically all publications in the field of foreign agriculture and trade. Since that date, the Economic Research Service has produced a major portion of these publications. Reports of research in the fields of foreign agriculture and trade comprise an increasing share of published material.

Under the classification OTHER are included a small number of publications pertaining to foreign agriculture issued by the Agricultural Research Service and Agricultural Marketing Service of the Department, and by State Experiment Stations and research institutions in other countries conducting research under P. L. 480 contracts.

Special sections list papers and speeches delivered by officials of the Department, and proceedings of important conferences.

In general, titles of speeches and reports appear but once. Headings and explanatory notes facilitate location of desired items by geographic regions or subject matter breakdown.

REGIONAL

This section lists all materials pertaining exclusively to the regions or their component countries except the following, which are to be found under separate headings: World and regional agricultural situation reports; estimates of food balances; food budgets; and U.S. foreign agricultural trade and analysis.

## PERIODICALS AND PERIODIC REPORTS

Contain foreign economic information in the form of reports, analyses, research results, statistics, and charts.

### Foreign Agricultural Service

1. Foreign Agriculture, weekly. This publication was started in January 1963 by combining the old Foreign Agriculture and Foreign Crops and Markets. It provides world agricultural news, and reports and interprets agricultural developments, especially those that affect U. S. agricultural exports. It features U. S. market development activities abroad and international programs and policies affecting U. S. trade. It carries feature articles of reporting, analysis, and prediction relating to Foreign Agriculture and Agricultural Trade.
2. World Agricultural Production and Trade, statistical report issued monthly. This report supplements the articles in the weekly Foreign Agriculture and presents statistical commodity reports supported by narrative descriptions and explanations. These deal with periodic production and trade by countries. Commodities are reported on a regular time schedule which is available in advance.

Country summaries present export and import agricultural trade statistics by countries and commodities.

### Economic Research Service

1. Foreign Agricultural Trade of the United States, published monthly. An analytical review of the foreign agricultural trade situation of the United States, emphasizing current status and outlook for U. S. agricultural trade including Food-for-Peace shipments, is presented in this publication. Exports are estimated for 1 month later than that reported by the Bureau of the Census. Summaries are shown of cumulative data on quantity and value from July 1 of the current year with comparisons for the corresponding period of the previous year; cumulative country totals from July 1 of the current year; and quantity indices of exports and imports for selected commodity groups. Government program information consists of quantity and value totals for individual commodities and countries. Detail is provided on sales for dollars, P. L. 480 by title, Commodity Credit Corporation and Export-Import Bank credit, and total exports. Also included are fiscal year estimates of the value of exports assisted by payments-in-kind and by sales below domestic market prices as well as estimates of the amount of export assistance paid.

#### U. S. Foreign Agricultural Trade Situation--Statistical Supplements.

(Currently, supplements are included in individual monthly issues of this periodical.)

##### (a) Commodity totals

Annual supplement containing detailed tables of the quantity and value

of annual exports and imports for 2 years; quantity indices of annual exports and imports for several years; and historical series. Calendar year supplement is usually available after April 15; fiscal year issue, after November 15.

(b) Trade by Countries

Annual supplement containing detailed tables of the quantity and value of annual exports and imports of principal products for 1 year in commodity-by-country and country-by-commodity order. Includes country totals for all commodities and for nonagricultural as well as agricultural items. Calendar year issue is usually available after June 15; fiscal year, after December 15.

(c) Imports of Fruits and Vegetables Under Quarantine

Detailed annual report of the quantity of arrivals of fresh fruits and vegetables, including commodity breakdowns not available from Bureau of Census records. Usually issued in the fall or winter on a fiscal year basis only.

. Foreign Gold and Dollar Reserves

Semiannual report carrying forward changes in the external financial positions of foreign countries with special reference to the effect of such changes on opportunities for selling U. S. farm products abroad.

. Checklist of Reports

Issued by the Economic Research Service and the Statistical Reporting Service, listing ERS and SRS publications issued during the previous month. Periodicals are not included except for annual statistical compilations. Publications of research conducted under contract with P. L. 480 funds by State experiment stations and foreign research institutions are included.

. The Agricultural Chart Book

Issued each fall by the Economic Research Service, Foreign Agricultural Service, Agricultural Research Service, and Statistical Reporting Service. Contains charts and maps with accompanying data and texts. One section of the chart book is devoted to our foreign trade. In addition, charts for exports of individual commodities are included.

. The Farm Index

This monthly publication is an index to the activities of the Economic Research Service. It is also a guide to the approximately 90 research reports, including reports on foreign agricultural economics and U. S. agricultural trade, and 40 periodicals published by the agency throughout the year.

Abridged reports of ERS articles and studies on foreign agriculture and trade are also carried in the Farm Index with footnote citations identifying the complete study on which the review is based.

Abstracts of recent research reports including those pertaining to foreign agriculture and U. S. agricultural trade are provided in a special section of the publication.

6. Agricultural Economic Research, published quarterly. This is a journal of economic and statistical research in the U. S. Department of Agriculture and cooperating agencies. Comprehensive abstracts of selected recent research publications issued by the Department and cooperatively by State universities and colleges appear at the end of each issue.
7. World Agricultural Situation. Annual report for the world with supplements by regions, giving a review of agricultural production and trade for the current year with prospects for the year ahead. Developments are reviewed by commodity, as well as by country and region. Agricultural production indices are included. For information on recent issues see pages 6 and 7.
